The line graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The x-axis is labeled with the months 'Jun', 'Jul', 'Aug', and 'Sep'. The y-axis represents the number of cases, with a grid line at 100. The data shows a period of relative stability with minor fluctuations in June, followed by a sharp increase starting in mid-July. A major peak occurs around July 25, with the number of cases exceeding 100. This is followed by a rapid decline in late July and early August. The case count remains low through mid-August, then rises again to a secondary peak in late August, before declining once more in early September.

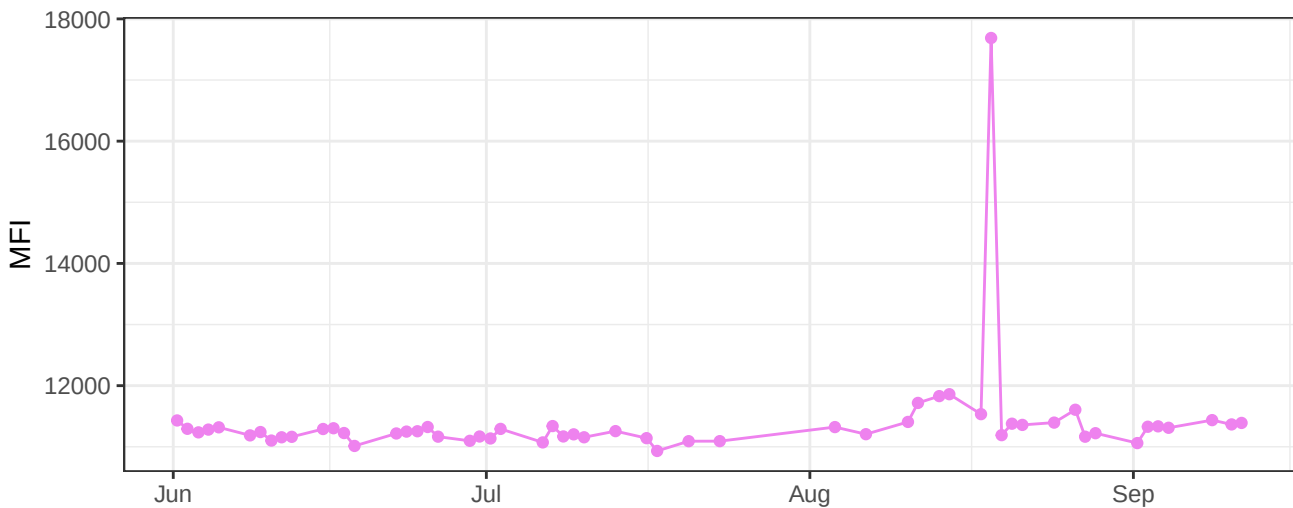

Date	Number of Cases

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The x-axis represents time, with labels for June, July, August, and September. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of relative stability with low case counts (mostly below 10,000) from June through mid-August. Starting in late August, there is a significant and rapid increase in cases, reaching a peak of approximately 100,000 cases in early September. Following this peak, the number of cases begins to decline, returning to levels around 10,000 by the end of the period shown.

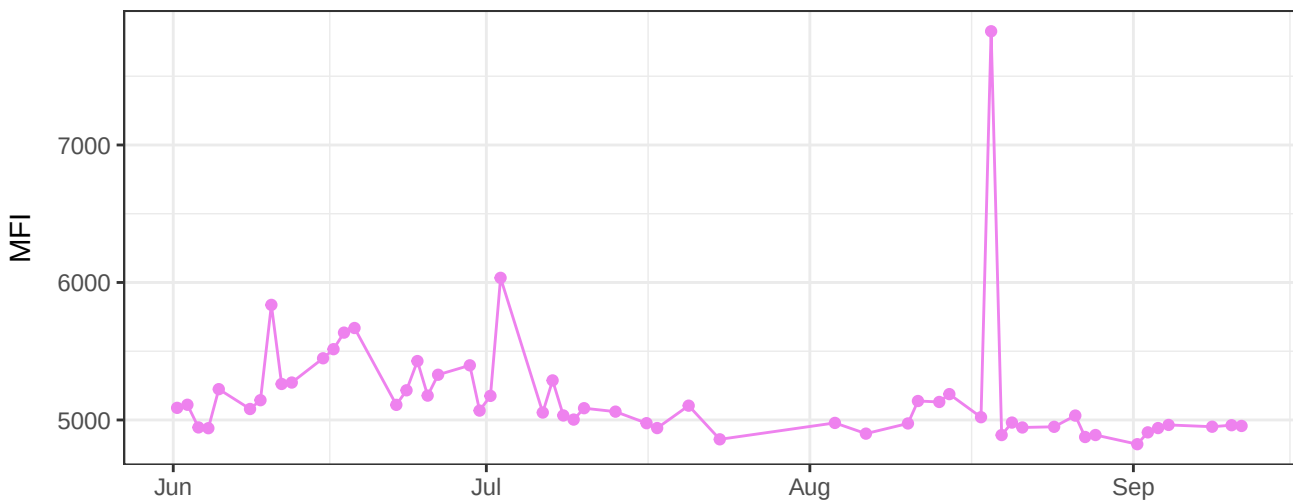

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 15, 2020. The y-axis is labeled 'Number of cases' and ranges from 0 to 1,000,000 in increments of 200,000. The x-axis is labeled with the months 'Jun', 'Jul', 'Aug', and 'Sep'. The data shows a period of relative stability with low case counts (mostly below 100,000) from June through mid-August. A significant surge begins in late August, reaching a peak of nearly 1,000,000 cases in early September. Following this peak, there is a sharp decline and subsequent fluctuations, with case counts generally remaining between 50,000 and 150,000 through mid-September.

Date (Approximate)	Number of Cases (Approximate)
June 1	100,000
June 15	80,000
July 1	100,000
July 15	120,000
August 1	100,000
August 15	150,000
August 25	800,000
September 1	1,000,000
September 5	50,000
September 15	100,000

The graph displays the daily count of COVID-19 cases in the United States from June 1 to September 1, 2020. The y-axis represents the number of cases, ranging from 0 to 1,000,000 in increments of 200,000. The x-axis shows the months of June, July, August, and September. A prominent peak occurs in early July, reaching nearly 1,000,000 cases. Following this peak, the case count drops sharply and remains relatively low until mid-August, when it rises again to around 200,000. Another significant peak occurs in late August, reaching approximately 400,000 cases. The graph ends in early September with a slight upward trend.

Date	Number of Cases (Approximate)
June 1	150,000
June 10	250,000
June 20	100,000
June 30	100,000
July 1	100,000
July 10	100,000
July 20	100,000
July 30	100,000
August 1	100,000
August 10	100,000
August 20	100,000
August 30	100,000
September 1	100,000

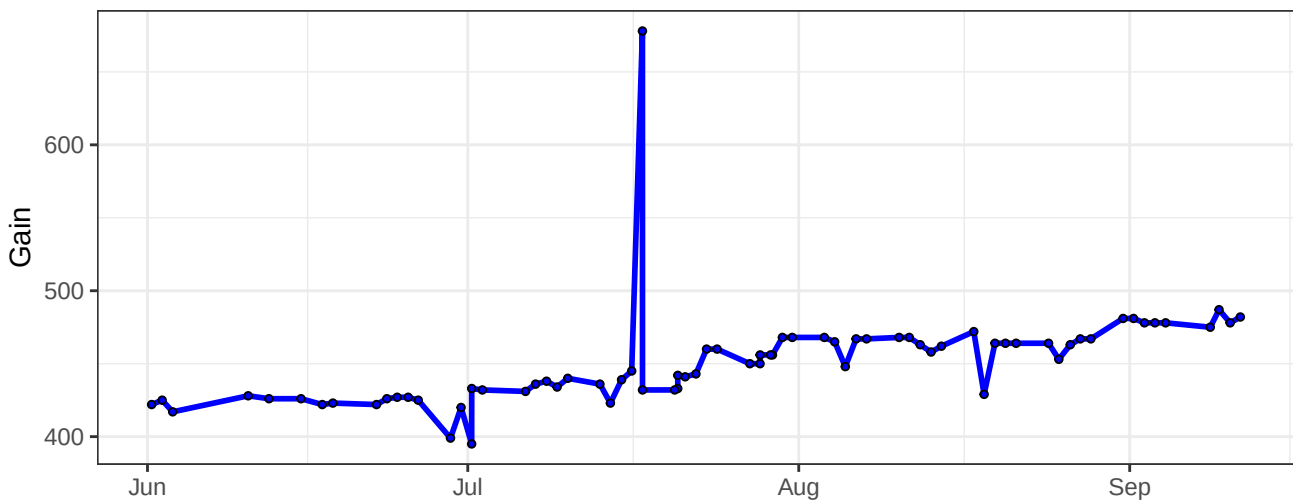

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The y-axis represents the number of cases, ranging from 0 to 1,000,000 in increments of 200,000. The x-axis shows the months of June, July, August, and September. The data is represented by a blue line with circular markers at each data point. A major peak occurs in early July, reaching nearly 1,000,000 cases. This is followed by a sharp drop and then a period of relative stability with minor fluctuations, including a smaller peak in late August.

Date	Number of Cases (approximate)
June 1	400,000
June 10	500,000
June 20	300,000
June 30	250,000
July 1	800,000
July 5	950,000
July 10	300,000
July 20	150,000
July 25	600,000
July 30	100,000
August 1	100,000
August 10	200,000
August 20	150,000
August 30	150,000
September 1	150,000

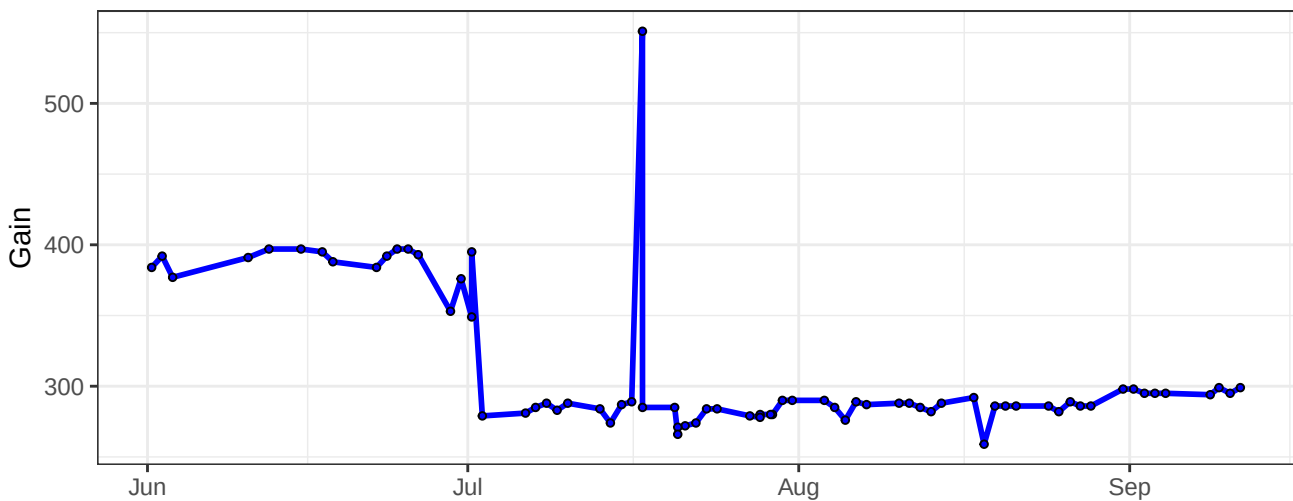

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 15, 2020. The x-axis represents time, with labels for June, July, August, and September. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of low case counts in June, followed by a sharp increase in late July. A significant peak occurs in early August, reaching nearly 100,000 cases. Following this peak, the case count fluctuates between approximately 40,000 and 60,000 through the remainder of the period shown.

Date	Number of Cases (Approximate)
June 1, 2020	10,000
June 15, 2020	15,000
June 30, 2020	10,000
July 1, 2020	40,000
July 15, 2020	45,000
July 25, 2020	95,000
August 1, 2020	55,000
August 15, 2020	50,000
August 30, 2020	55,000
September 1, 2020	60,000
September 15, 2020	55,000

The graph displays the daily number of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The x-axis represents time, with labels for June, July, August, and September. The y-axis represents the number of cases, with a scale from 0 to 1,000,000. The data shows a period of low case counts in June, followed by a significant rise in July. A major peak occurs in early August, reaching nearly 1,000,000 cases. Following this peak, the number of cases declines sharply and remains relatively low through September.

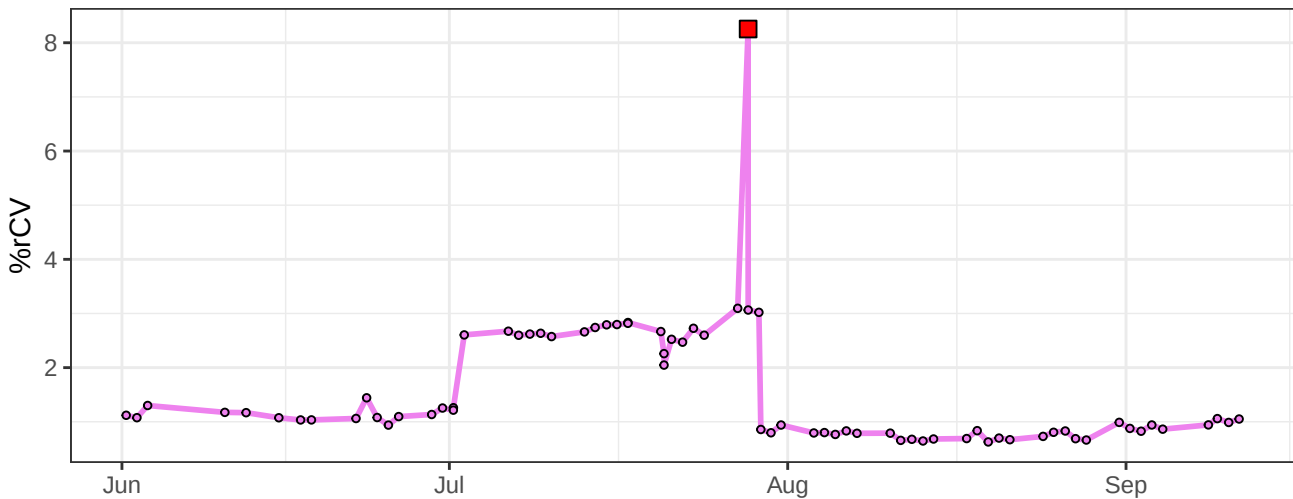

Date	Number of Cases (Approximate)
June 1	100,000
June 15	150,000
June 30	200,000
July 1	250,000
July 15	300,000
July 25	350,000
August 1	400,000
August 5	950,000
August 10	100,000
August 20	50,000
September 1	100,000

The graph illustrates the daily reported COVID-19 cases in the Netherlands. The data shows a period of low activity in June, followed by a gradual increase in July. A major surge occurs in late July, peaking at approximately 9,500 cases. This is followed by a sharp drop in early August, after which the case numbers remain relatively low and stable through September.

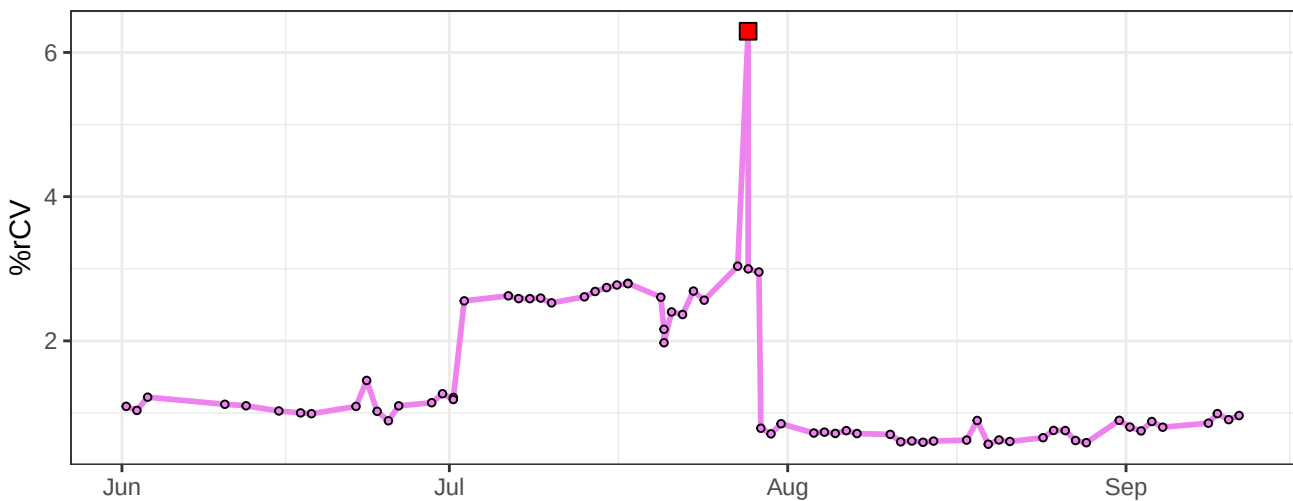

Date (approx.)	Number of Cases (approx.)
June 1	1,000
June 15	1,500
June 30	1,000
July 1	1,500
July 15	2,500
July 25	3,000
July 30	9,500
August 1	1,000
August 15	1,500
August 30	1,000
September 1	1,500
September 15	1,000
September 30	1,500

The graph illustrates the daily reported COVID-19 cases in the Netherlands. The data shows a significant peak in early August, reaching nearly 1000 cases, which is highlighted by a red square. Following this peak, the number of cases drops sharply and remains relatively low through the end of September.
