The graph illustrates the daily count of COVID-19 cases in the United States. The data shows a period of low activity followed by a significant surge in late August, a period of high activity in early September, a decline in mid-September, and a final sharp increase at the end of the period shown.

The graph displays the daily count of active COVID-19 cases in the Madrid region. The data shows significant fluctuations, with a notable peak in mid-September reaching over 69,325 cases. There are several periods of relative stability, such as the plateau around 69,275 cases in late August and early September, and another around 69,250 cases in mid-September.

The graph displays the daily closing price of the Dow Jones Industrial Average over a period of approximately 45 days. The price begins at a high of about \$91.2 on August 1, then experiences a sharp decline to around \$90.1 by August 3. It continues to fluctuate, reaching a significant low of \$88.0 on August 11. Following this, the price shows a general upward trend with some volatility, peaking at approximately \$89.3 on August 28. It then declines again to a low of about \$88.1 on September 1, before ending at \$89.0 on September 17.
