The graph displays the daily number of cases over time. The y-axis represents the number of cases, ranging from 0 to 100. The x-axis shows the months from June to September. The data is plotted as a pink line with open circles. Red squares are placed on the line at specific points, indicating daily new cases or a specific metric. The data shows a significant peak in late July, reaching nearly 100 cases, followed by a sharp decline and then a period of relative stability with minor fluctuations through September.

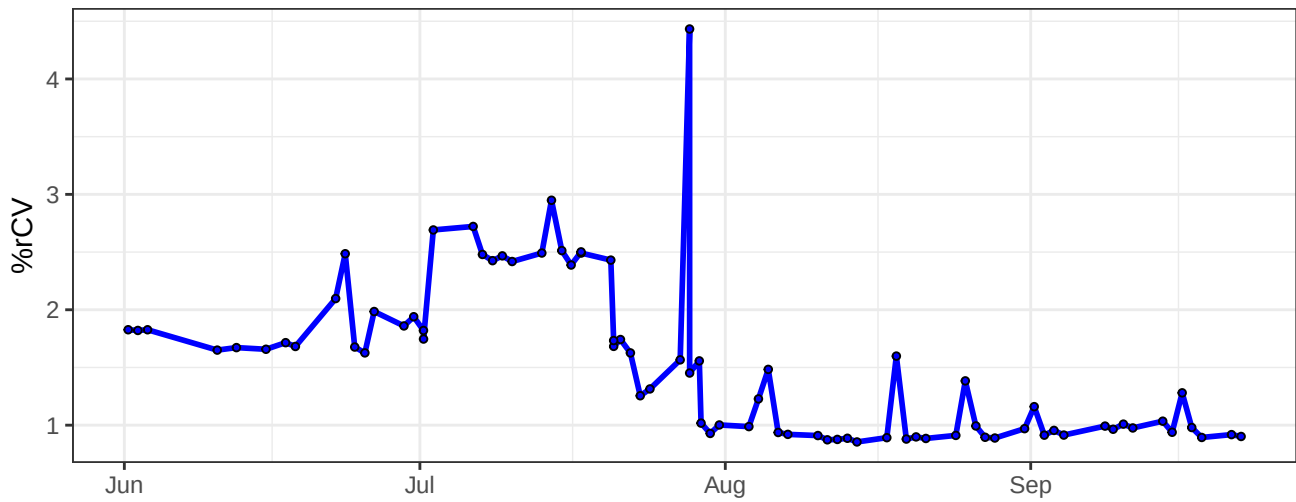

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The x-axis represents time, with labels for June, July, August, and September. The y-axis represents the number of cases, with a scale from 0 to 1,000,000. The data shows a period of relative stability in June and early July, followed by a significant surge in late July. Cases peaked at approximately 1,000,000 in early August and then experienced a sharp decline, stabilizing at a lower level through September.

Date	Number of Cases (Approximate)
June 1, 2020	100,000
June 15, 2020	100,000
June 25, 2020	150,000
July 1, 2020	100,000
July 15, 2020	400,000
July 25, 2020	400,000
August 1, 2020	100,000
August 5, 2020	1,000,000
August 15, 2020	100,000
August 25, 2020	100,000
September 1, 2020	100,000

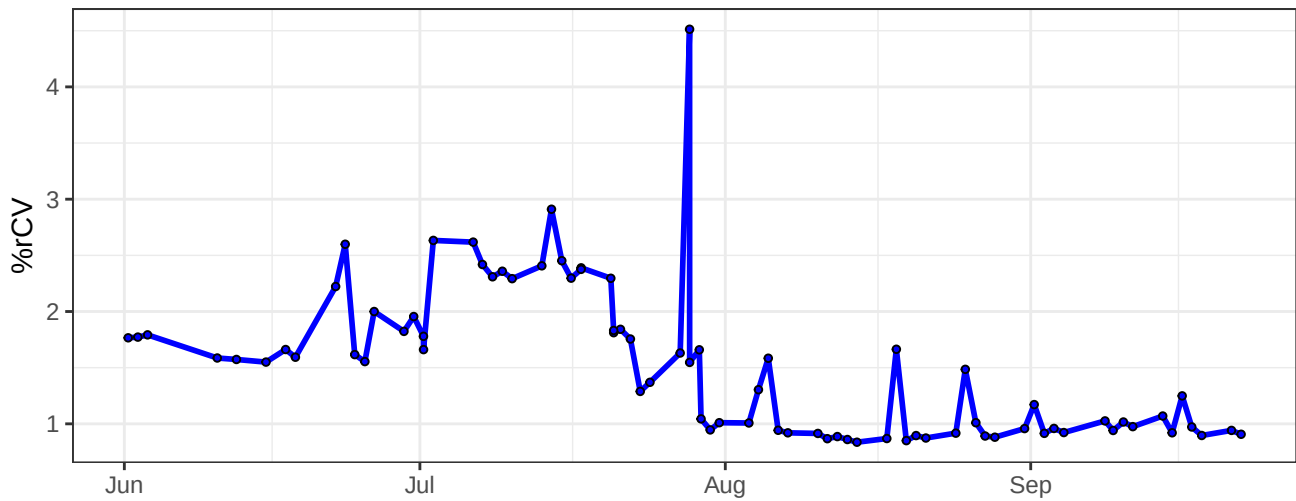

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The y-axis represents the number of cases, ranging from 0 to 120,000 in increments of 20,000. The x-axis shows the months of June, July, August, and September. The data shows a period of low case counts in June, followed by a sharp increase in early July, peaking at approximately 105,000 cases around July 25th. After the peak, the case counts decline sharply, with a notable dip in late July, followed by a period of relative stability with minor fluctuations, ending around 10,000 cases by September 1st.

Date	Number of Cases (Approximate)
June 1	10,000
June 15	10,000
June 25	15,000
July 1	15,000
July 15	40,000
July 25	105,000
August 1	10,000
August 15	10,000
August 25	15,000
September 1	10,000

The line graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The y-axis represents the number of cases, ranging from 0 to 100,000 in increments of 20,000. The x-axis shows the months of June, July, August, and September. The data is plotted as a blue line with black circular markers at each data point. The graph shows a sharp increase in cases starting in mid-June, peaking at approximately 100,000 cases in late June. This is followed by a period of relative stability with minor fluctuations between 20,000 and 40,000 cases through July. A second, even higher peak occurs in late August, reaching nearly 100,000 cases. Following this peak, there is a significant drop in cases, with a small secondary rise in early September before a final decline towards the end of the month.

Date	Number of Cases (Approximate)
Jun 1	40,000
Jun 5	20,000
Jun 10	10,000
Jun 15	10,000
Jun 20	10,000
Jun 25	20,000
Jun 30	100,000
Jul 5	20,000
Jul 10	40,000
Jul 15	20,000
Jul 20	20,000
Jul 25	20,000
Jul 30	20,000
Aug 5	20,000
Aug 10	20,000
Aug 15	20,000
Aug 20	20,000
Aug 25	20,000
Aug 30	20,000
Sep 1	20,000

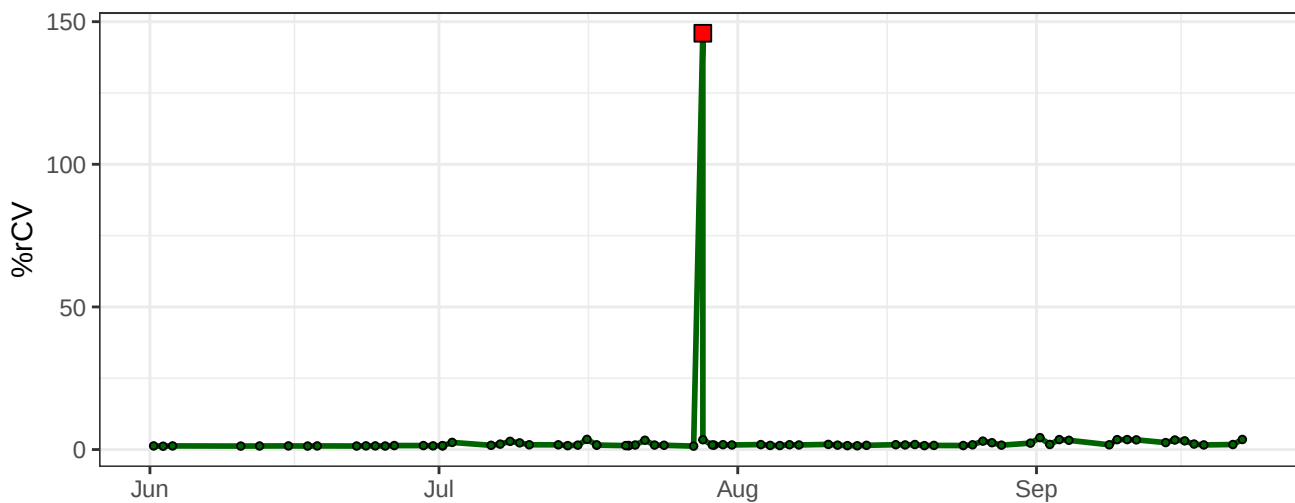

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The y-axis represents the number of cases, ranging from 0 to 100,000. The x-axis shows the months of June, July, August, and September. The data shows a sharp increase in cases starting in mid-June, peaking at approximately 100,000 cases in late June. This is followed by a period of relative stability with minor fluctuations. A second, smaller peak occurs in late August, reaching about 40,000 cases. The graph ends in early September with a slight decline in cases.

The graph displays the daily count of COVID-19 cases in the United States from June 1 to September 1, 2020. The y-axis is labeled 'Number of cases' and ranges from 0 to 1,000,000 in increments of 200,000. The x-axis is labeled with the months 'Jun', 'Jul', 'Aug', and 'Sep'. The data is plotted as a blue line with black circular markers at each data point. A prominent peak occurs in early July, reaching approximately 950,000 cases, which is marked with a red square. Following this peak, the case count drops sharply and then fluctuates at a lower level, with another notable peak in late August reaching about 300,000 cases. The overall trend shows a significant increase in cases during the summer months, peaking in early July, and then a period of relative stability with minor fluctuations through September.

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 15, 2020. The x-axis represents time, with labels for June, July, August, and September. The y-axis represents the number of cases, with a scale from 0 to 1,000,000. The data shows a period of low case counts in June, followed by a significant rise in July. A major peak occurs in late August, reaching nearly 1,000,000 cases. This is followed by a decline and then a second, slightly lower peak in late September, before a final decline towards the end of the period shown.

Date	Number of Cases (Approximate)
June 1, 2020	100,000
June 15, 2020	100,000
July 1, 2020	100,000
July 15, 2020	200,000
August 1, 2020	100,000
August 15, 2020	950,000
September 1, 2020	200,000
September 15, 2020	100,000

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The x-axis represents time in months (Jun, Jul, Aug, Sep), and the y-axis represents the number of cases, ranging from 0 to 1,000,000. The data shows a significant surge in cases starting in late July, reaching a peak of approximately 1,000,000 cases in late July. Following this peak, the number of cases declines sharply and then fluctuates between approximately 200,000 and 400,000 cases through September.

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The x-axis represents time, with labels for June, July, August, and September. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a period of relative stability in June, followed by a significant surge in late July. Cases peaked at approximately 100,000 in late August, then experienced a sharp decline, followed by a period of fluctuation and a final peak in early September.

Date	Number of Cases (Approximate)
June 1, 2020	10,000
