The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for April and July. The y-axis represents the number of cases, with a scale from 0 to 100,000. The data shows a significant peak in early April, followed by a decline and then a period of relative stability. A second, even sharper increase begins in late August, reaching a peak in early September before declining again.

The graph displays the daily number of COVID-19 cases in the United Kingdom. The x-axis represents time, with labels for 'Apr' and 'Jul'. The y-axis represents the number of cases, with a major grid line at 100,000. The data shows a significant peak in cases around April 2020, followed by a period of relative stability and then a sharp increase starting in late 2020, reaching another peak in early 2021.
