The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for August 03, August 10, August 17, August 24, August 31, and September 07. The y-axis represents the number of cases, with a grid extending up to 100,000. The data shows a period of low case counts (below 10,000) until mid-August, followed by a rapid ascent to a peak of approximately 100,000 cases around August 21. After a brief dip, the case count remains consistently high, near the 100,000 mark, through the end of the period shown.

The graph displays the daily count of COVID-19 cases in the United States. The x-axis represents time, with labels for August 03, August 10, August 17, August 24, August 31, and September 07. The y-axis represents the number of cases, with a grid extending to 100,000. The data shows a period of low case counts (near zero) from August 3 to August 10. Starting around August 10, there is a rapid increase in cases, reaching a peak of approximately 95,000 cases around August 17. Following this peak, the case count fluctuates but remains high, generally staying above 80,000 cases per day. By late August and early September, the case count stabilizes at a high level, around 90,000 cases per day.

The line graph illustrates the daily count of new COVID-19 cases in the United States over a period of approximately 40 days, from August 3 to September 10, 2020. The y-axis represents the number of cases, ranging from 0 to 100,000 in increments of 20,000. The x-axis marks specific dates: Aug 03, Aug 10, Aug 17, Aug 24, Aug 31, and Sep 07. The data shows a high initial rate of cases (around 90,000) on August 3, which quickly drops to about 40,000 by August 5. After a slight rise to 50,000 on August 6, the numbers decline again to 30,000 by August 8. From August 9 onwards, the daily case counts fluctuate between approximately 20,000 and 40,000, with a notable dip to around 10,000 cases on August 21. The overall trend suggests a period of high initial activity followed by a decline and subsequent stabilization with daily fluctuations.

Date	Daily New Cases (Approximate)
Aug 03	90,000
Aug 04	90,000
Aug 05	40,000
Aug 06	50,000
Aug 07	30,000
Aug 08	35,000
