The graph illustrates the daily reported COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The y-axis represents the number of cases, with major grid lines at 0, 200,000, 400,000, 600,000, 800,000, and 1,000,000. The x-axis marks the months of June, July, August, and September. A prominent peak occurs in late July, with cases exceeding 1,000,000. Following this peak, the number of cases drops sharply and remains relatively low, with minor fluctuations, through the end of the period shown.

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The x-axis represents time in months (Jun, Jul, Aug, Sep), and the y-axis represents the number of cases, ranging from 0 to 120,000. The data shows a period of low case counts in June, followed by a sharp increase in late July, peaking at approximately 105,000 cases in early August. After the peak, the case count drops sharply and remains relatively stable, fluctuating between 10,000 and 20,000 cases through September.

Date	Number of Cases (Approximate)
Jun 1	15,000
Jun 15	10,000
Jun 25	25,000
Jul 1	20,000
Jul 15	30,000
Jul 25	35,000
Aug 1	105,000
Aug 15	15,000
Aug 25	20,000
Sep 1	15,000

The graph displays the daily number of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The x-axis represents time, with labels for June, July, August, and September. The y-axis represents the number of cases, with a scale from 0 to 100,000. A prominent red square marker is placed at the peak of the curve in early August, indicating the highest recorded daily case count. The data shows a period of relative stability in June and July, followed by a rapid ascent to the peak in August, and then a gradual decline through September.

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The y-axis is labeled 'Number of cases' and ranges from 0 to 1,000,000 in increments of 200,000. The x-axis is labeled with the months 'Jun', 'Jul', 'Aug', and 'Sep'. The data is represented by a blue line with circular markers at each data point. A prominent peak occurs in late July, reaching approximately 1,100,000 cases. Following this peak, the number of cases drops sharply and remains relatively low through August and September, with a minor secondary peak in late August.

The graph displays the daily count of COVID-19 cases in the United States from June 1, 2020, to September 1, 2020. The y-axis is labeled 'Number of cases' and ranges from 0 to 1,000,000 in increments of 200,000. The x-axis is labeled with the months 'Jun', 'Jul', 'Aug', and 'Sep'. The data is represented by a blue line with circular markers at each data point. A prominent peak occurs in late July, reaching approximately 1,100,000 cases. Following this peak, the number of cases drops sharply and then fluctuates between approximately 200,000 and 400,000 through August and the beginning of September.
