The graph illustrates the daily reported COVID-19 cases in the Netherlands. A prominent peak is observed in mid-July, where cases reached approximately 9,500. Following this peak, the number of cases dropped sharply and remained relatively low, generally staying below 1,000 cases per day, with some minor fluctuations throughout the rest of the period shown.

The graph displays the daily count of COVID-19 cases in the United States. The y-axis is labeled 'Number of cases' and ranges from 0 to 1,000,000 in increments of 200,000. The x-axis is labeled 'Date' and shows the months of June, July, August, and September. A prominent red square marker is placed at the peak of the graph in mid-July, indicating the highest recorded daily case count. The data shows a period of low case counts in June, followed by a sharp increase in July, a peak in mid-July, and then a decline and stabilization in August and September.

The graph displays the daily number of COVID-19 cases in the Netherlands from June 1, 2020, to September 1, 2020. The y-axis is labeled 'Number of cases' and ranges from 0 to 10,000 in increments of 2,000. The x-axis is labeled with the months 'Jun', 'Jul', 'Aug', and 'Sep'. The data is represented by a blue line with black circular markers at each data point. The number of cases starts at approximately 4,000 in early June, remains relatively stable until mid-June, then rises sharply to a peak of about 10,000 cases in early July. Following this peak, there is a rapid decline to around 1,000 cases by mid-July. The number of cases then fluctuates slightly, staying between 1,000 and 2,000 through August and September.

Date (Approx.)	Number of Cases (Approx.)
Jun 1	4,000
Jun 15	4,500
Jun 25	4,500
Jul 1	4,000
Jul 5	10,000
Jul 15	1,000
Jul 25	1,000
Aug 1	1,500
Aug 15	1,000
Aug 25	1,000
Sep 1	1,500
